

# ***International Conference on Safety & Innovation***

**Rome 11-12-13 March 2025**

***First edition***

## **Call for Papers**

The first international conference on Safety & Innovation managed by Department of technological innovations and safety of plants, products, and anthropic settlements Inail (Dit) is held in collaboration with ISSA Section Machine and System Safety.

The conference will be held in Rome 11-12-13 March 2025, at Inail headquarters - P.le Pastore 6 Rome.

### ***Conference topics***

#### **[1] Innovative technologies for safety**

**Info:** Innovative technologies are very promising for safety at workplaces. We appreciate papers describing innovative solutions enhancing safety levels supporting workers during their activities on field or eliminating/reducing risks by design.

#### **[2] Safety of innovative products**

**Info:** New technologies embedded in products such as machines, vessels, plants and production lines, personal protective equipment (PPE) shall not affect the safety of the products themselves. We appreciate papers describing innovative products compliant with regulation, solutions to make them compliant and, very interesting, highlighting standardization gaps.

### **[3] Innovative systems for specialist training**

**Info:** Innovative systems such as using VR, AR and MR are going to be studied and seem to be promising for worker's training. Especially when the trainee will have to face high risks. Moreover, it'll be interesting to highlight different national protocol or guidelines. We consider papers on the analysis of characteristics (field of application, technologies, ..... ) and evaluation of effectiveness of these new training models compared to traditional ones.

### **[4] Workspace safety**

**Info:** The workspace is the volume allocated to one or more persons in the work system to complete a work task. Employers must manage the work system to allow safe working activity.

We appreciate papers considering innovative solutions for work system design, focusing on relationship between work system design and the worker's behaviour and skills.

### **[5] Safety of living environments and anthropic settlements**

**Info:** The detection and remediation of polluting sources and the predictive control of structures and plants is essential to prevent very important risks both for the extent of the damage and for the extension of their effects to a large population. We appreciate papers analyzing innovative procedures and technologies for remediation and control of human settlements and living environments.

### **[6] Systems for inclusive safety (gender difference, ageing population, disability)**

**Info:** Inclusive systems focus on the needs of every individual and ensure that the right conditions are in place for each person to achieve their potential. Moreover, inclusion should be reflected in an organization's culture, practices and relationships that are in place to support a diverse workforce.

We appreciate papers studying requirements and technical innovative solutions for designing of tools, equipment, machines and building systems and innovative training to achieve the same goal for safety & inclusion at work.

We invite authors interested in proposing technical-scientific papers, practice-related papers, examples of good practice and case study to send the abstracts to [dit.segreteriaeventi@inail.it](mailto:dit.segreteriaeventi@inail.it) by September 13th, following the instructions below.

Timeline:

<b>Submission of abstracts by</b>	<b>Notification of acceptance by</b>	<b>Submission of papers by</b>	<b>Paper review by</b>	<b>Paper final submission by</b>
September 13th	September 30th	November 10th	December 15th	January 15th

## ***Information for Authors***

- Each author can propose a maximum of 3 papers. The maximum number of authors for each contribution should be limited to 5 authors, except in the case of research involving more than one institution/University?
- For each abstract sent, the Secretariat will communicate effective reception and identification code assigned to the work, which must be used for all communications with the Secretariat;
- Notification of acceptance or otherwise of the abstract and the subsequent deadlines will be communicated to the relevant author.

## ***Instructions For Contribution Submission***

- The abstract, in English, must be as explanatory and exhaustive as possible (max 300 words);
- Title, Authors, Entities belonging, Theme of reference among those mentioned above (you can also indicate more than one) must be indicated.

All accepted works will be included in the final scientific program and published in the Conference Proceedings.
